Sharon suffered a mini stroke and an acquired brain injury, leaving her with only **ONE TENTH** of her previous information-processing ability, a fear of crowds (of any size), and super-sensitivity to light and sound. She has since overcome her diagnosis of "completely disabled" through years of hard work, focus and personal development.

Sharon proves that every adversity brings with it the seed of an equivalent advantage. Sharon shares her **B.E.S.T. Practices for a Calm Focused Presence** in any situation, board room, meeting or negotiations.
